MSAT-230 For SVR Series Repeaters

The Pyramid Communications MSAT-230 integrates SkyTerra's MSAT-G2 satellite radio to the popular Pyramid Communications SVR series vehicular repeaters. Plug and Play installation with no adjustments or modifications necessary. This cost effective solution provides on scene conventional portable radio coverage through SkyTerra's MSAT Two-Way Radio system

MSAT-230

- ◆ Integrates MSAT G2 Mobile Satellite Radio to Pyramid's SVR series Vehicular Repeaters.
- ◆ Provides on-scene communications using portable analog two-way radios.
- ◆ Built in A.G.C. provides reliable audio levels with a no-adjustment installation.
- ◆ Compact size for easy installation.
- ◆ Includes 1' cables to interface to MSAT G2.

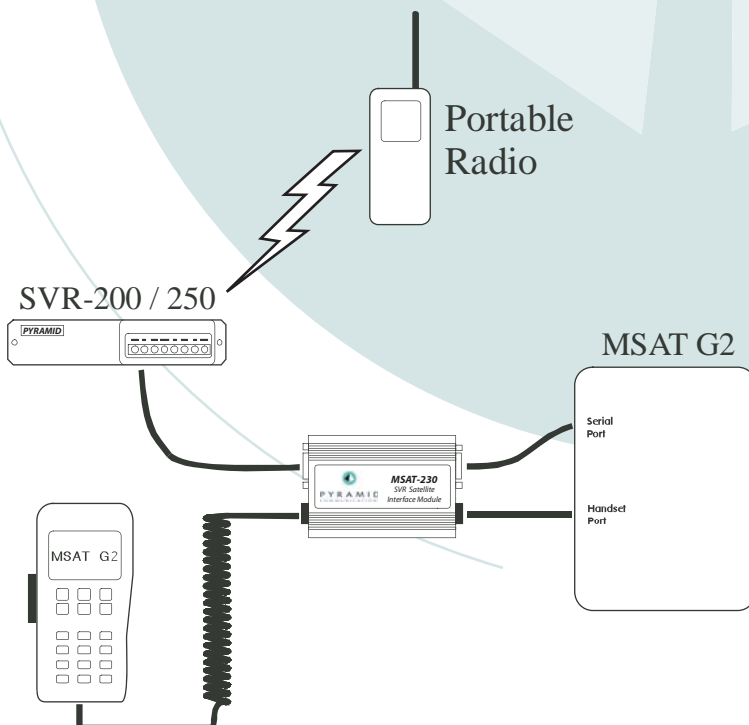

MSAT-230

MSAT G2 Interface Module

Benefits

- ◆ Provides low cost handheld coverage when terrestrial radio systems are not available or fail.
- ◆ Gives users the ability to leave the vehicle and still communicate through SkyTerra satellite network.
- ◆ SVR series repeaters allow communications with conventional two-way portables in VHF, UHF, 700, 800 & 900 MHz bands.
